Last Updated Wednesday, 11 March 2009

Version 0.99 of mSpecs Editor is available. The changes include:

- limited number of instances of the application to one.
- changed mass traces field of library element from a list of doubles to a list of doubles and their type.
- replaced retention index penalty by a positive and negative double.
- implemented scripting functionalities: importing and exporting of structures; automatic calculations.
- further bug fixes and minor improvements.
