Last Updated Wednesday, 11 March 2009

Version 1.01 of mSpecs Editor is available. Changes:

- the CAS-number and KEGG-numbers field is replaced by a generic identification-numbers field where the user can define the type of identification number.
- added an auto-backup feature for the libraries.
- the documentation file was missing in the windows installer.
- added an example library in the mlb file format.
- again bug fixes and minor improvements.
